Learning and Teaching Together Michele TD Tanaka, 2016-11-15 Across Canada, new curriculum initiatives require teachers to introduce students to Aboriginal content. In response, many teachers unfamiliar with Aboriginal approaches to learning and teaching are seeking ways to respectfully weave this material into their lessons. Learning and Teaching Together introduces teachers of all levels to an indigenist approach to education. Tanaka recounts how pre-service teachers enrolled in a crosscultural course in British Columbia immersed themselves in indigenous ways of knowing as they worked alongside indigenous wisdom keepers. Transforming cedar bark, buckskin, and wool into a mural that tells stories about the land upon which the course took place, they discovered new ways of learning that support not only intellectual but also tactile, emotional, and spiritual forms of knowledge. By sharing how one group of non-indigenous teachers learned to privilege indigenous ways of knowing in the classroom, Tanaka opens a path for teachers to nurture indigenist crosscultural understanding in their own classrooms.

Finally, long-deprived cardweaving enthusiasts can own their very own copy of Peter Collingwood's landmark book thanks to this high-quality 2015 reprint, complete with dozens of detailed photographs, pattern examples, and step-by-step instructions for each of the techniques presented. In addition to instructional information, *Techniques of Tablet Weaving* contains pages of historical context for a variety of weaving techniques with clear and helpful tips on reproducing them precisely, as well as modern variations on the classics.

Frances L. Goodrich's Brown Book of Weaving Drafts Barbara Miller, 2014-02-28 A collection of traditional eighteenth and nineteenth century weaving drafts, written sequences of the threading order on the loom used to create specific patterns. They are presented here in their original form as gathered by Frances L. Goodrich and illustrated in over 160 color photos. This volume also contains over 200 valuable modern translations of the same drafts for use by today's weavers. In 1890, Frances L. Goodrich came to the southern mountains in North Carolina from a life of culture to live and work among people who had little opportunity for education or social enrichment. Through her work for the Presbyterian Home Mission Board, she grew to love and respect these neighbors who worked so hard and had so little. She established schools, a small hospital, and the Allanstand Cottage Industries. As she traveled the mountain roads and trails on horseback, Miss Goodrich collected these precious weaving drafts from the women who wove for Allanstand Cottage Industries. In your hands is the heart of that collection.

Contemporary Approaches to Behaviour and Mental Health in the Classroom Emma Clarke, 2021-11-29 Based on latest research in the field, this book links theory and practice with key agendas and policies on behaviour, children's mental health and well-being. It considers how policy and research influence each other and provides a range of whole-school and individual-teacher actions to support all children, but particularly for those whose behaviour is seen as challenging. Emma Clarke provides guidance on how practitioners can most effectively support children and manage pupils' behaviour and tracks how theory and policy has had a meaningful impact on what we do in the classroom. The book is divided into three distinct parts, each with its own set of reflective activities and thinking points as well as suggestions for further reading. Chapters in Part I include a focus on what informs the actions taken to support and manage behaviour in the classroom. In Part II, the chapters move on to consider specific approaches and delve into the theories and research which underpin them. Part III shares ethos-focused approaches to supporting behaviour, including the use of philosophical inquiry by Dr Aimee Quickfall, a timely and highly important review of the 'eternal verities' by Professor John Visser, and an overview of Finnish perspectives on behaviour in schools, as Finland is often, and rightly, held up as a beacon on good practice. The book presents a range of research, policy and practice and, as such, aims to be of use to a range of readers. It can support and develop practitioners in the classroom, from early career teachers to those with a wealth of experience, as well as senior leaders and those working in wider contexts with children. It will also be useful for students and researchers due to the balance of theory and practice presented.

Towards an Ethic of Autism Kristien Hens, 2021-07-07 Kristien Hens succeeds in weaving together experiential expertise of both people with autism and their parents, scientific insights and ethics, and does so with great passion and affection for people with autism (with or without mental or other disabilities). In this book she not only asks pertinent questions, but also critically examines established claims that fail to take into account the criticism and experiences of people with autism. Sam Peeters, author of *Autistic Gelukkig* (Garant, 2018) and *Gedurfde vragen* (Garant, 2020); blog @ Tistje.com What does it mean to say that someone is autistic? *Towards an Ethics of Autism* is an exploration of this question and many more. In this thoughtful, wide-ranging book, Kristien Hens examines a number of perspectives on autism, including psychiatric, biological, and philosophical, to consider different ways of thinking about autism, as well as its meanings to those who experience it, those who diagnose it, and those who research it. Hens delves into the history of autism and its roots in the work of Leo Kanner and Hans Asperger to inform a contemporary ethical analysis of the models we use to understand autism today. She explores the various impacts of a diagnosis on autistic people and their families, the relevance of disability studies, the need to include autistic people fully in discussions about (and research on) autism, and the significance of

epigenetics to future work on autism. Hens weaves together a variety of perspectives that guide the reader in their own ethical reflections about autism. Rich, accessible, and multi-layered, this is essential reading for philosophers, educational scientists, and psychologists who are interested in philosophical-ethical questions related to autism, but it also has much to offer to teachers, allied health professionals, and autistic people themselves.
