Eyes Wide Shut Dallas Thompson,2011-11-07 When good leaders have good intentions and do not have accountability, good leaders become corrupt ... Who decides what the right thing is? ... William S. Burroughs, Metaphysical Detective Jackson Evil,2023-12-23 William S. Burroughs, *Metaphysical Detective* is a genre-defying exploration of the metaphysical, blending elements of detective mystery, science fiction, and surrealist fantasy. The narrative is a kaleidoscope of cosmic mysteries, where the line between reality and the fantastical blurs, and the protagonist's journey becomes a metaphorical dance in the cosmic symphony of existence. In the imaginary city of Interzone, where the neon-lit streets pulse with enigmatic energies, Detective William S. Burroughs embarks on a surreal mystery through multidimensional realities populated with literary outlaws and strange beings. The narrative weaves a tale of satirical metaphors in electric imagery and wordplay that bends the boundaries of language and reality. The story unfolds across 25 chapters, each with a unique blend of hard-boiled detective noir, surreal science fiction, and mind-bending plot twists. Burroughs, armed with a golden gun and guided by the Language of the Dead, navigates the mysterious alleys, celestial gardens, and esoteric cathedrals of Interzone. As the detective delves deeper, he faces a series of cosmic challenges, from an esoteric cathedral to an ethereal gateway and a cosmic apex. The narrative takes unexpected turns, weaving in the

cosmic symphony; a tapestry of temporal flux, celestial symbols, and occult mysteries. Burroughs' journey culminates in his rebirth as a cosmic guardian, tasked with safeguarding Interzone's eternal secrets. The beatniks, Lexicographers, and Nova accompany him in the ongoing dance of revelations, and the novel concludes with a cosmic resonance that echoes through the neon jungle that is the Naked City of Interzone.

Empire of Reason Lewis Pyenson, 1989 Analyzes pure scientific research in the Dutch East Indies during the 19th and 20th centuries in the context of imperialist and colonial ideologies. Indic Manuscript Cultures through the Ages Vincenzo Vergiani, Daniele Cuneo, Camillo Alessio Formigatti, 2017-12-18 This collection of essays explores the history of the book in pre-modern South Asia looking at the production, circulation, fruition and preservation of manuscripts in different areas and across time. Edited by the team of the Cambridge-based Sanskrit Manuscripts Project and including contributions of the researchers who collaborated with it, it covers a wide range of topics related to South Asian manuscript culture: from the material dimension (palaeography, layout, decoration) and the complicated interactions of manuscripts with printing in late medieval Tibet and in modern Tamil Nadu, to reading, writing, editing and educational practices, from manuscripts as sources for the study of religious, literary and intellectual traditions, to the creation of collections in medieval India and Cambodia (one major centre of the so-called Sanskrit cosmopolis), and the formation of the Cambridge collections in the colonial period. The contributions reflect the variety of idioms, literary genres,

religious movements, and social actors (intellectuals, scribes, patrons) of ancient South Asia, as well as the variety of approaches, interests and specialisms of the authors, and their impassionate engagement with manuscripts.

Weird Earth Donald R. Prothero, 2020-07-14 “A breath of intellectual fresh air . . . [an] amusing look at how to dispel endemic pseudoscience and conspiracy theories through rational thinking.” —Publishers Weekly Aliens. Ley lines. Water dowsing. Conspiracies and myths captivate imaginations and promise mystery and magic. Whether it’s arguing about the moon landing hoax or a Frisbee-like Earth drifting through space, when held up to science and critical thinking, these ideas fall flat. In *Weird Earth: Debunking Strange Ideas About Our Planet*, Donald R. Prothero demystifies these conspiracies and offers answers to some of humanity’s most outlandish questions. Applying his extensive scientific knowledge, Prothero corrects misinformation that con artists and quacks use to hoodwink others about geology—hollow earth, expanding earth, and bizarre earthquakes—and mystical and paranormal happenings—healing crystals, alien landings, and the gates of hell. By deconstructing wild claims such as prophecies of imminent natural disasters, Prothero provides a way for everyone to recognize dubious assertions. Prothero answers these claims with facts, offering historical and scientific context in a light-hearted manner that is accessible to everyone, no matter their background. With a careful layering of evidence in geology, archaeology, and biblical and historical records, Prothero’s *Weird Earth* examines each conspiracy and myth and leaves no question unanswered. *Weird Earth* is about the facts and the people who don’t believe them. Don Prothero describes the process of science—and the process of not accepting it. If you’re wondering if humans walked on the Moon, if you’ve wondered where the lost City of Atlantis went, or if you’re wondering what your cat will do before an earthquake, check out *Weird Earth*.” —Bill Nye

Alien Manuscripts, Onyx Cubes & Runes Darryl Gopaul, 2019-10-18 This tale involves human imagination that describes the massive progress of mankind throughout his short primate evolution. If the dates of the astro physicists are to be believed the findings of antiquity do not tangibly reveal the developed skills necessary for the innovative advancements attributed to our primitive past. Ancient monoliths and structures have inherent measurements that man at that stage of evolving did not have the education or ability to calculate the metrics of Earth in this solar system. Genetic insertion assisted in hastening the evolution of this primate species of nomads wandering the Earth in search of food. Who interfered? Why? Were these ancient artifacts left for a future generation to interpret and report to this planet of story creators and story tellers? An old couple tries to work out the puzzle unknowing that mankind’s future was being discussed out in the solar sytem.

The Chu Silk Manuscripts from Zidanku, Changsha (Hunan Province) Li Ling, 2020-03-15 The Silk Manuscripts from Zidanku, Changsha (Hunan), are the only preImperial Chinese manuscripts on silk found todate. Dating to the turn from the 4th to the 3rd centuries BC (Late Warring States period), they contain several short texts concerning basic cosmological

concepts, arranged in a diagrammatic arrangement and surrounded by pictorial illustrations. As such, they constitute a unique source of information complementing and going beyond what is known from transmitted texts. This is the first in a two-volume monograph on the Zidanku manuscripts, reflecting almost four decades of research by Professor Li Ling of Peking University. While the philological study and translation of the manuscript texts is the subject of Volume Two, this first volume presents the archaeological context and history of transmission of the physical manuscripts. It records how they were taken from their original place of interment in the 1940s and taken to the United States in 1946; documents the early stages in the research on the finds from the Zidanku tomb and its reexcavation in the 1970s; and accounts for where the manuscripts were kept before becoming the property, respectively, of the Arthur M. Sackler Foundation, New York (Manuscript 1), and the Freer and Sackler Galleries, Smithsonian Institution (Manuscripts 2 and 3). Superseding previous efforts, this is the definitive account that will set the record straight and establishes a new basis for future research on these uniquely important artifacts.

We, The Wanted Matthew Schultz, Jordan Lepore, 2021-04-30 When famine emigrant Patrick Gallagher, secures passage aboard a transatlantic coffin ship from County Cork, Ireland, to the Grosse Île Quarantine Station, Canada, he finds himself prey to a very different sort of hunger. Meanwhile, Angèle Paris D'Arcantel, a Vodou priestess, flees slavery and impending Civil War in New Orleans. She rides the Underground Railroad north along the Mississippi River to an abandoned lighthouse forsaken in the remote Adirondack wilderness at the brink of a vast, cursed forest and the harrowing bluffs of Lake Champlain. *We, The Wanted* is a fully illustrated novel charting the unverified and unverifiable mythologies of seemingly disparate folklores: Irish, Haitian, and Native American, that converge beneath the beacon of the Split Rock Lighthouse as a way of exploring the contemporary phenomena of disenchantment. Shining a light upon the mysterious and tragic history of the American Northeast and across the tortured generations who weathered its storm, *We, The Wanted* is a gothic tale of grim isolation, the consequences of (dis)belief, and the monsters that continue to lurk beyond the pale of civilization hoping to lure us into their darkness.

A Poet in the Bardo Shyamal Bhattacharjee, 2023-11-29 Shyamal Bhattacharjee's second English novel *A Poet in the Bardo* tells the story of a man who is dying in an accident. In those moments of death the man sees his whole life in some flashes wherein human concepts of space and time have no bearing. Even all the events that could have happened but did not happen in life become some miraculous visual experiences and lead him to overcome various bonds and obstacles towards a peaceful death. As the movement of a newly deceased soul towards a desired rebirth or void is described within the pattern of Tibetan Bardo Thodol or Book of the Dead, this novel also describes an equivalent experience. The amazing epicness of the language of that description belongs to Shyamal Bhattacharjee's own poetic style.

Unmodern Philosophy and Modern Philosophy John Dewey, 2012-05-16 800x600 Normal 0 false false false EN-US X-NONE Microsoft Internet Explorer 4 In 1947 America's premier philosopher, educator, and public intellectual John Dewey purportedly lost his last manuscript on modern philosophy in the back of a taxicab. Now, sixty-five years later, Dewey's fresh and unpretentious take on the history and theory of knowledge is finally available. Editor Phillip Deen has taken on the task of editing Dewey's unfinished work, carefully compiling the fragments and multiple drafts of each chapter that he discovered in the folders of the Dewey Papers at the Special Collections Research Center at Southern Illinois University Carbondale. He has used Dewey's last known outline for the manuscript, aiming to create a finished product that faithfully represents Dewey's original intent. An introduction and editor's notes by Deen and a foreword by Larry A. Hickman, director of the Center for Dewey Studies, frame this previously lost work. In *Unmodern Philosophy and Modern Philosophy*, Dewey argues that modern philosophy is anything but; instead, it retains the baggage of outdated and misguided philosophical traditions and dualisms carried forward from Greek and medieval traditions. Drawing on cultural anthropology, Dewey moves past the philosophical themes of the past, instead proposing a functional model of humanity as emotional, inquiring, purposive organisms embedded in a natural and cultural environment. Dewey begins by tracing the problematic history of philosophy, demonstrating how, from the time of the Greeks to the Empiricists and Rationalists, the subject has been mired in the search for immutable absolutes outside human experience and has relied on dualisms between mind and body, theory and practice, and the material and the ideal, ultimately dividing humanity from nature. The result, he posits, is the epistemological problem of how it is possible to have knowledge at all. In the second half of the volume, Dewey roots philosophy in the conflicting beliefs and cultural tensions of the human condition, maintaining that these issues are much more pertinent to philosophy and knowledge than the sharp dichotomies of the past and abstract questions of the body and mind. Ultimately, Dewey argues that the mind is not separate from the world, criticizes the denigration of practice in the name of theory, addresses the dualism between matter and ideals, and questions why the human and the natural were ever separated in philosophy. The result is a deeper understanding of the relationship among the scientific, the moral, and the aesthetic. More than just historically significant in its rediscovery, *Unmodern Philosophy and Modern Philosophy* provides an intriguing critique of the history of modern thought and a positive account of John Dewey's naturalized theory of knowing. This volume marks a significant contribution to the history of American thought and finally resolves one of the mysteries of pragmatic philosophy.

The Chrome e-Manuscripts Ramón Reyes Borges, 2014-12-04 At the dawn of the 21st Century a new universe of reflection within America reveals itself through deep spiritual inner-observation and extra-sensory perception; THE UNIVERSE OF CHROME. These e-manuscripts are a life journal of self-discovery and achievement, compiled for many years

and electronically written and created in the last 15 years. It reveals the existence of human perception across space and time, as it brings forth a futuristic sports culture heterosexual Christian based religion, a divine spiritual language code that translates and interprets accurate numeric messages, and its measurements of time uses the memory of Jesus Christ as a prophetic time marker of fulfillment. It introduces the CHROME Boy Scouts and Girl Scouts (a heterosexual scouts' program) with a civic practice program and rank ascension. The program is focused on self-achievement and excellence represented by CHROME; the tallest royal tower trophy in the universe.

Astronomical Knowledge Transmission Through Illustrated Aratea Manuscripts Marion Dolan, 2017-08-22 This carefully researched monograph is a historical investigation of the illustrated Aratea astronomical manuscript and its many interpretations over the centuries. Aratus' 270 B.C.E. Greek poem describing the constellations and astrological phenomena was translated and copied over 800 years into illuminated manuscripts that preserved and illustrated these ancient stories about the constellations. The Aratea survives in its entirety due to multiple translations from Greek to Latin and even to Arabic, with many illuminated versions being commissioned over the ages. The survey encompasses four interrelated disciplines: history of literature, history of myth, history of science, and history of art. Aratea manuscripts by their nature are a meeting place of these distinct branches, and the culling of information from historical literature and from the manuscripts themselves focuses on a wider, holistic view; a narrow approach could not provide a proper perspective. What is most essential to know about this work is that because of its successive incarnations it has survived and been reinterpreted through the centuries, which speaks to its importance in all of these disciplines. This book brings a better understanding of the history, changes and transmission of the original astronomical Phaenomena poem. Historians, art historians, astronomy lovers, and historians of astronomy will learn more specialized details concerning the Aratea and how the tradition survived from the Middle Ages. It is a credit to the poetry of Aratus and the later interpreters of the text that its pagan aspects were not edited nor removed, but respected and maintained in the exact same form despite the fact that all sixty Aratea manuscripts mentioned in this study were produced under the rule of Christianity.

From Astronautics to Cosmonautics Mike Gruntman, 2007 Two pioneers of space exploration, Robert Esnault-Pelterie and Ary Sternfeld, introduced the words 'astronautics' and 'cosmonautics,' respectively, into the scientific language. The origin of the term 'astronautics' is well documented. In contrast, the history of the word 'cosmonautics' remains poorly known. Ary Sternfeld is also largely forgotten. The fiftieth anniversary of the breakthrough to space, celebrated in 2007, makes it especially appropriate to remember those visionaries who paved the way to cosmos. The book tells the stories of 'astronautics' and 'cosmonautics' and describes a most unusual life journey of Ary Sternfeld
